

TRUPON[®] LH

fatliquor for all types of soft leathers

| | |
|--------------------|-------------------------------------------------------------|
| Basis: | mixture of natural vegetable oils and non-ionic emulsifiers |
| Appearance: | brown, viscous oil |
| Charge: | anionic |
| Active matter: | approx. 97 % |
| pH value (1 : 10): | approx. 6,5 |
| Acid stability: | medium |
| Salt stability: | medium |
| Chrome stability: | medium |
| Light fastness: | good |
| Heat yellowing: | good |

Properties:

TRUPON LH is a highly concentrated lecithin based fatliquor.

TRUPON LH can be used for the fatliquoring process of chrome-tanned leathers as well as for chrome-free leathers.

Leathers fatliquored with **TRUPON LH** exhibit excellent softness together with a pleasant, round, slightly waxy handle.

Application:

TRUPON LH can be used alone or in combination with other fatliquors. The quantity to be applied will depend upon the type of leather and softness required.

In the main fatliquor process up to 12 % **TRUPON LH**, calculated on shaved weight, can be

applied.

Safety and storage:

When handling **TRUPON LH**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

TRUPON LH can be stored for up to 18 months, if temperatures below 5 °C and above 40 °C can be avoided. On prolonged storage or extremes of temperature **TRUPON LH** may exhibit some settlement which can be rectified by either warming and/or stirring the product thoroughly before use.
