

TRUPOSLIP[®] PN

slipping agent

Appearance:	beige powder
pH value (1 : 100):	approx. 6.5

Properties:

TRUPOSLIP PN can be used for all aqueous processes in the production of leather.

TRUPOSLIP PN reduces the friction in all drum processing, especially when short floats are used by the tannery.

TRUPOSLIP PN reduces the mechanical action, degree of knotting, false backs and extent of nubuk grain, particularly for thin pelts and wet blue.

Application:

The full function of **TRUPOSLIP PN** is best produced by dispersing in water prior to application. However, if more convenient, it is also possible to add **TRUPOSLIP PN** as a powder and run for 30 mins.

TRUPOSLIP PN should be applied in the lime process after the hair has been removed.

The quantity applied depends on the material and the position in the process. The normal quantity offered is 0.1 - 0.3 %, based on the relevant hide weight.

Safety and storage:

When handling **TRUPOSLIP PN**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

TRUPOSLIP PN can be stored for up to 24 months, if kept in a dry place.
