

TRUPOSOL[®] LEX

highly nourishing fatliquor for auto and upholstery leather

Basis:	sulphated and sulphited natural and synthetic raw materials, phospholipids and anionic stabilisers
Appearance:	red brown semi viscous oil
Charge:	anionic
Active matter:	approx. 95 %
pH value(1 : 10):	approx. 7
Acid stability:	medium
Salt stability:	medium
Chrome stability:	low
Light fastness:	excellent
Heat yellowing:	good

Properties:

TRUPOSOL LEX has been specifically designed as a highly nourishing fatliquor for use in the production of automobile and upholstery leathers.

TRUPOSOL LEX is highly suited for use in the fatliquoring of both chrome and chrome-free leathers, where it will assist not only in improving surface, handle and feel, but also in maintaining tear and tensile strength properties.

TRUPOSOL LEX exhibits excellent fogging values.

The extremely high active substance contained in **TRUPOSOL LEX** facilitates great economy of use, whilst at the same time allowing outstanding softening characteristics to be achieved.

When used in the production of “chrome free” automobile leather **TRUPOSOL LEX** will impart to the leather excellent inner softness coupled with a warm mellow handle.

TRUPOSOL LEX will not bleach or lighten anionic dyeings.

Application:

TRUPOSOL LEX can be used alone or in combination with other **TRUPOSOL** fatliquors.

Quantities to be used will vary depending upon the type and softness of the leather required.

TRUPOSOL LEX can be used to good effect as a top fatliquor, where it will assist in producing a pleasant well lubricated surface handle on the leather.

Safety and storage:

When handling **TRUPOSOL LEX**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

TRUPOSOL LEX can be stored for up to 18 months, if temperatures below 5 °C and above 40 °C can be avoided. On prolonged storage or extremes of temperature **TRUPOSOL LEX** may exhibit some settlement which can be rectified by either warming and/or stirring the product thoroughly before use.
