

TRUPONOL[®] LAN

fatliquor for sports leather

Basis:	sulphited lanolin / fish oil
Appearance:	brown viscous oil
Charge:	anionic
Active matter:	approx. 57 %
pH value (1 : 10):	approx. 8
Acid stability:	excellent
Salt stability:	excellent
Chrome stability:	good
Light fastness:	excellent
Heat yellowing:	medium

Properties:

TRUPONOL LAN is an anionic fatliquor based on high grade lanolin.

Leathers fatliquored with TRUPONOL LAN exhibit well lubricated grain characteristics and a slightly waxy handle.

TRUPONOL LAN is ideally suited to the fatliquoring of rugged sports leathers such as baseball, glove, bridle and saddle leather.

TRUPONOL LAN can be used to good effect on vegetable tanned and heavily retanned chrome leathers where its use ensures high nourishment and lubrication properties.

Application:

TRUPONOL LAN can be used alone or in combination with other anionic fatliquors. We would not, however, recommend the addition of water insoluble oils to the product.

Safety and storage:

When handling TRUPONOL LAN, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

TRUPONOL LAN can be stored for up to 18 months, if temperatures below 5 °C and above 40 °C can be avoided. On prolonged storage or extremes of temperature TRUPONOL LAN may exhibit some settlement which can be rectified by either warming and/or stirring the product thoroughly before use.
