

TRUPON[®] LP1

universal economical fatliquor

Basis:	sulphited and sulphated natural and synthetic raw materials
Appearance:	yellow brown pourable oil
Charge:	anionic
Active matter:	approx. 50 %
pH value(1 : 10):	approx. 7.5
Acid stability:	low
Salt stability:	good
Chrome stability:	low
Light fastness:	excellent
Heat yellowing:	medium

Properties:

TRUPON LP1 is a semi synthetic economical fatliquor specifically designed to produce leathers with excellent softness and fullness.

TRUPON LP1 can be used on a wide variety of leathers from full chrome to semi chrome and will provide excellent grain lubrication properties.

TRUPON LP1 will not make the leather loose or empty.

TRUPON LP1 will not bleach or lighten anionic dyeings.

Application:

TRUPON LP1 can be used alone or in combination with other anionic fatliquors.

Quantities to be used will be dependent upon the softness required but will normally range

between 5 - 10 %, based upon shaved weight.

Safety and storage:

When handling **TRUPON LP1**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

TRUPON LP1 can be stored for up to 18 months, if temperatures below 5 °C and above 40 °C can be avoided. On prolonged storage or extremes of temperature **TRUPON LP1** may exhibit some settlement which can be rectified by either warming and/or stirring the product thoroughly before use.
