

TRUPOTAN[®] DCS

masking agent

Appearance:	yellow liquid
Basis:	combination of salts of dicarbonic acids
pH value (1 : 10):	approx. 5.5

Properties:

TRUPOTAN DCS is an auxiliary agent with balanced masking properties.

TRUPOTAN DCS improves chrome exhaustion and chrome fixation and provides even chrome distribution.

TRUPOTAN DCS contributes to an excellent full and fine grain leather.

TRUPOTAN DCS results in a very clear and even wet blue colour.

Application:

TRUPOTAN DCS is added undiluted at the end of the pickle process or 30 – 60 minutes after the addition of chrome powder.

The usual quantity to be applied varies between 1.0 – 1.7 %, based on pelt weight.

Safety and storage:

When handling **TRUPOTAN DCS**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

TRUPOTAN DCS can be stored for up to 24 months, if temperatures below 5 °C and above 40 °C can be avoided.
