

PASTOSOL[®] ED

enzymatic degreasing agent

Appearance:	light yellow powder
Basis:	lipolytic enzymes
pH value (1 : 10):	approx. 6

Properties:

PASTOSOL ED improves the degreasing effect in combination with surfactants and proteolytic enzymes.

PASTOSOL ED accelerates the soaking effect when used together with proteolytic soaking enzymes e. g. **TRUPOWET[®]** products.

Leather treated with **PASTOSOL ED** exhibits excellent grain tightness and very level dyeing properties.

PASTOSOL ED possesses optimum efficiency in the pH range 9 - 12 .

Application:

PASTOSOL ED can be used in soaking, liming and bating.

The degreasing effect can be supported if used together with proteolytic products, such as **TRUPOWET[®]** in the soak and **TRUPOZYM[®]** in the bate.

For fatty hides and skins the addition of surfactants is needed. In this case, the surfactant should be added 30 mins. after the application of **PASTOSOL ED**.

The necessary quantity of **PASTOSOL ED** depends upon raw material and process step. The usual dosage is 0.2 – 0.4 %, based on salted weight/pelt weight.

Safety and storage:

When handling **PASTOSOL ED**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

PASTOSOL ED can be stored for up to 24 months in a dry and cool place.
