

TRUPOSEPT[®] FC

fungicide

Appearance:	slight beige emulsion
Basis:	mixture of octylisothiazolon + carbendazim
pH value (1 : 10):	approx. 7

Properties:

TRUPOSEPT FC is a biodegradable fungicide with low odour.

TRUPOSEPT FC is free from TCMTB.

TRUPOSEPT FC exhausts quickly and evenly onto the hide.

Optimum efficiency of **TRUPOSEPT FC** is obtained between pH 2 and 7.

TRUPOSEPT FC is suitable for the preservation of wet blue, wet-white and vegetable-tanned leather.

Application:

Wet blue:

0.1 - 0.3 % **TRUPOSEPT FC** (calculated on pelt weight) is added during the chrome tannage, depending on storage period and climatic conditions in order that sufficient preservation is guaranteed. 0.03 % **TRUPOSEPT FC** is recommended for an additional surface protection at the end of the tanning process or in the wash float.

TRUPOSEPT FC is recommended to be added after the fatliquor exhaustion if a fatliquor e.g. **TRUPON[®] PEM** is used during chrome tannage.

Wet-white:

0.15 - 0.4 % **TRUPOSEPT FC** (calculated on pelt weight) is added during pretannage.

The quantity to be used is dependent on storage period and climatic conditions.

If a fatliquor e.g. **TRUPON[®] PEM** is applied during pretannage, **TRUPOSEPT FC** will also be added after fatliquor exhaustion.

Vegetable-tanned leather:

The quantity to be used in the vegetable tanning process is between 0.3 and 0.6 % **TRUPOSEPT FC** (calculated on pelt weight). With regard to usage of fatliquor please refer to our previous comments.

Notes:

- the quantities of **TRUPOSEPT FC** mentioned are to be understood as guidelines only. Climatic and storage conditions, quality of skins and hides and working conditions should be taken into consideration.
- **TRUPOSEPT FC** should be diluted in ratio of 1 : 3 in order that an even distribution is guaranteed.
- Chemicals that have a reductive effect, i.e. sodium bisulphite should not be applied directly with **TRUPOSEPT FC**.

Safety and storage:

When handling **TRUPOSEPT FC**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

TRUPOSEPT FC can be stored for up to 24 months, if temperatures below 5 °C and above 40 °C can be avoided.

Use biocides safely. Always read the label and product information before use.
