

TRUPOTAN[®] GRN

replacement syntan

Basis:	phenolic compounds
Appearance:	light beige powder
Charge:	anionic
pH value(1 : 10):	approx. 4.5
Light fastness:	good
Heat yellowing:	good

Properties:

TRUPOTAN GRN is a replacement syntan for the retannage of all types of leather, but is especially useful for the production of chrome-free car upholstery leather.

TRUPOTAN GRN gives leather an outstanding softness with excellent fullness and round handle.

TRUPOTAN GRN produces a fine grained leather with an elegant level milled grain pattern.

Application:

In the retannage of wet blue a quantity of between 4 and 6 % **TRUPOTAN GRN**, calculated on the wet blue weight, is recommended.

For the retannage of chrome-free car upholstery leather, up to 10 % of **TRUPOTAN GRN** is recommended to support the vegetable tannage.

Safety and storage:

When handling **TRUPOTAN GRN**, normal safety precautions associated with the handling of chemicals should be observed. For more specific details please refer to our safety data sheets.

TRUPOTAN GRN can be stored for up to 18 months, if kept in a dry place.
